ENGINEERING EXECUTIVE | SAAS TRANSFORMATION | CLOUD & AI ENABLEMENT | AGILE LEADERSHIP

Strategic and growth-driven Director of Software Engineering with 20+ years leading high-performing, globally distributed teams across SaaS, insurance, enterprise, and federal sectors. Proven record of scaling teams, modernizing mission-critical platforms, and aligning technology strategy with business outcomes. Expert in cloud architecture (AWS, Azure, OCI), microservices, and enterprise AI enablement to include embedding LLM-powered tooling into SDLC workflows, delivery management, and engineering productivity at scale. Recognized for developing strong leaders, aligning technology strategy to business outcomes, and driving measurable improvements in velocity, reliability, and customer satisfaction.

CORE LEADERSHIP COMPETENCIES

- Organizational Leadership & Growth: Org Design | Talent Development | Executive Collaboration | Cross-Functional Strategy
- Delivery Excellence: Agile Transformation | CI/CD | DevOps | Engineering KPIs | Continuous Improvement
- Technology Strategy: Cloud Modernization | Microservices | SaaS Architecture | Platform Scalability
- AI & Intelligent Automation — Enterprise LLM Integration | OpenAI API Adoption | AI-Assisted SDLC Automation | GitHub Copilot | Claude | ChatGPT | Cline | Workflow Automation | Developer Productivity Acceleration
- Business Impact — KPI Definition | Budget Oversight | Roadmapping | Risk & Change Management

SELECTED ACHIEVEMENTS

- Scaled global engineering org from 30 → 60+, building leadership depth and structure.
- Cut time-to-market 30% through Agile adoption, CI/CD modernization, and automation.
- Modernized 3 major product lines to cloud-native microservices (AWS, Azure, OCI), improving scalability, reliability, and deployment velocity.
- Improved deployment reliability that reduced production incidents and improved customer satisfaction.
- Led enterprise-wide adoption of AI-assisted development (LLMs, Copilot, Claude) that allowed increased developer productivity, automating test creation, bug remediation, spec generation, and backlog creation, which helped to increase engineering velocity.
- Transitioned entire engineering organization to modern tooling stack (Linear, Incident.io, Omni Analytics), improving delivery visibility, incident response coordination, and cross-functional reporting.

PROFESSIONAL EXPERIENCE

Patriot Software – Canton, OH/Remote

Director of Software Engineering | Nov 2021 – Present

- Lead a nationally distributed organization of 60+ Software Engineers and QA professionals delivering SaaS HR, Payroll, Time, and Accounting platforms.
- Built leadership depth through structured manager mentorship and clear accountability models.
- Collaboratively architect scalable AWS systems and guide microservices modernization.
- Drove Agile implementation and CI/CD adoption, improving quality and cadence.

- Developed enterprise AI adoption strategy, deploying LLM-powered tools (OpenAI APIs, Copilot, Claude, Cline, Gemini) across engineering teams to enhance development, technical documentation, automate test generation, bug fixing, spec generation, story breakdown, and backlog creation.
- Integrated AI workflows with Linear MCP to automatically generate and decompose user stories, accelerating project planning.
- Designed internal analytics dashboards for delivery metrics and engineering productivity insights, enabling executive-level decision support.
- Designed and deployed AI-powered applications leveraging OpenAI APIs and secure cloud infrastructure, applying LLM capabilities to real-world SaaS and workflow automation scenarios.
- Orchestrated full transition of engineering tooling to Linear (planning), Incident.io (incident management), and Omni Analytics (data reporting), maintaining delivery momentum through the transition.

Mutual Benefit Group – Huntingdon, PA/Remote

Software Engineering Manager / 2020 – 2021

- Directed global .NET teams migrating core insurance systems to the Azure cloud.
- Implemented Agile and CI/CD, increasing release frequency and improving production stability.
- Partnered with the CIO to establish delivery and performance dashboards.

Planet Technologies – Harrisburg, PA/Remote

Senior Project Management Consultant / 2019 – 2020

- Led full-stack SaaS teams delivering mission-critical cloud applications.
- Transitioned project management and backlog tooling to Azure DevOps and improved planning efficiency.
- Expanded Agile frameworks, ensuring consistent on-time delivery.

Oracle – Bozeman, MT

Software Engineering Manager / 2016 – 2019

- Managed global SaaS teams on Oracle Cloud Infrastructure.
- Led transition to microservices and CI/CD adoption, improving scalability and deployment velocity.
- Implemented Test-Driven Development practices to improve code quality and predictability.

Liberty Mutual Insurance – Portsmouth, NH

Senior IT Project Manager / Scrum Master / 2015 – 2016

- Spearheaded Agile transformation across multiple teams and coached Scrum Masters.
- Partnered with Product Owners to define roadmap, scope, and metrics for success.

Bose Corporation – Framingham, MA

Software Engineering Manager / 2013 – 2015

- Led transition to Agile methodologies, developing in-house Scrum Master and Coach training.
- Oversaw R&D prototype facilities and automated software testing environments.

Earlier Career — Harris Corporation (2001–2012)

- Progressed from Software Engineer to Software Program Manager, overseeing a \$100M FAA weather program and managing 50+ staff across engineering, finance, and operations.
- Delivered complex, mission-critical weather systems deployed nationwide and internationally.

EDUCATION & SERVICE

B.S., Computer Science — University of Central Florida, Orlando, FL

United States Navy — Honorable Service

TECHNICAL HIGHLIGHTS

Azure • AWS • Oracle Cloud Infrastructure • Microservices • SaaS • .NET • C# • Python • JavaScript • SQL • Docker • Kubernetes • CI/CD • GitHub • Azure DevOps • Agile • OpenAI APIs • Enterprise LLM Adoption • AI-Assisted Development
